Clear Label Sensor

Ultrasonic
CLEAR LABEL Sensor

TRI-TRONICS® introduces the very

first **Ultrasonic Clear Label Sensor** with a High Performance Graphic OLED display. The OLED display provides the user with an unprecedented view of the sensor's performance, options, program modes, and helpful simple instructions never before offered in a Clear Label Sensor. Designed into the sensor are all the Ease-of-Use characteristics that have made Tri-Tronics' sensors so well known in the industry.

The Ultrasonic Clear Label Sensor is the answer to what the industry has been asking for...

"a reliable, durable, high quality clear label sensor that provides visual confirmation of proper setup and function..." a simple solution, with the ability to accurately adjust for repeatable and reliable performance.

Now "CONFIDENTLY" walk away from the labeling line, "KNOWING" the throughput is at peak performance and trouble free.

Initiate Dynamic Set

```

```
```
Dynamic Set
Tap +/- to End
```
Dynamic Set is a convenient and easy way to set up the CLS sensor. Once initiated, simply pull labels and gaps through the sender receiver transducers and then push the Gap or Label button to complete. This feature is also available via the remote set wire. Dynamic Set is beneficial when holding the gap in place is not easily accomplished, or physical access to the sensor is not practical.

Auto Adjust

```
Auto Adjust:
On (AUTO)
```
```
Auto Adjust:
Off
```

The Auto Adjust feature is helpful in applications with diminishing conditions...such as dirty or dusty environments, or with inconsistent label or web material thickness. This feature bumps up the gain automatically in order to maintain a functional and repeatable contrast between labels and gaps.

### Output Mode

```
Output Mode:
Label (▯▯)
```
```
Output Mode:
Gap(▯▯)
```

The Output Mode allows the user to decide which is more important to detect...the label or the gap. The leading or trailing edge of labels may be more desirable to receive an output in some applications than others. This option allows the user to make that determination and provides flexibility in real world conditions.

### Display Orientation

```

```

For visual preference, the Display Orientation allows the user to flip the screen for a more user-friendly visibility.

### Timer Mode (**Advanced Option)

```
Timer Mode:

```
```
Timer Mode:
Off Delay
```
```
Timer Mode:
On Delay
```
```
Timer Mode:
One Shot
```
```
Timer Mode:
Debounce
```

The Timer Mode is offered as an Advanced Option. This feature provides users with the option to condition the output specifically for the application requirement.

Off Delay:  Extends the Output Time.
On Delay:  Extends the Input Time.
One Shot:  Provides a defined Output "On" Time.
Debounce: Provides an Anti-Chatter timer.

### Button Lockout

```
Button Lockout:
Off
```
```
Button Lockout:
On (🔒)
```

Button Lockout is useful for maintaining a set up without worry. This is tamper-proof, and reassures the continued performance of the sensor and up-time of the production line.

### Quick Reference

```
  Quick Reference
Top +/- : Scroll Text
   Run Mode
```

Quick Reference was included as a way to visually instruct through the different set up options. This feature also includes contact information for the factory.

Sensor Scope (**Advanced Option)

The Sensor Scope is also an Advanced Option and allows the user to visually see how the sensor is detecting the target. Whether the labels or web materials are inconsistent, or noise issues occur occasionally, this feature clearly shows the user exactly where the problems are and how to resolve the issue quickly.
