PC Board Mountable Pressure Sensor Combination Temperature and Pressure Analog Output and I<sup>2</sup>C or SPI Digital Output Gage, Differential, Absolute, Compound, Vacuum 3.3 or 5.0Vdc Supply Voltage

### **MS45xx Series**

The MS45xx series is a small, ceramic based, PCB mounted pressure transducer using Measurement Specialties' proprietary UltraStable™ technology (MS4525/MS4525DO) and the latest CMOS sensor conditioning circuitry. This series contains both analog output (MS4515/MS4525) and digital output (MS4515DO/MS4525DO) where the digital output versions feature either I²C or SPI interface and provide 14-bit pressure as well as 11-bit temperature sensing.

It is fully calibrated and temperature compensated with a total error band (TEB) of less than 1.0% over the compensated range. The sensor operates from a single supply of either 3.3 or 5.0Vdc and requires a single external component for proper operation. The rugged ceramic transducer is available in side port, top port, and manifold mount and can measure pressure up to 30inH<sub>2</sub>O (MS4515/MS4515DO) and 150psi (MS4525/MS4525DO). The 1/8" barbed pressure ports mate securely with 3/32" ID tubing.

#### **FEATURES**

- PCB Mountable
- High Level Analog Output and I<sup>2</sup>C or SPI Digital Output
- Barbed Pressure Ports
- inH<sub>2</sub>O and PSI Pressure Ranges

#### **APPLICATIONS**

- Blocked Filter Detection
- Altitude and Airspeed Measurements
- Medical Instruments
- Fire Suppression System
- Panel Meter
- Factory Automation
- Leak Detection
- Vacuum System Process Controls
